

Felt Ribbon

by Ana Cabrera

Felt is all the rage right now! However, pre-made felt embellishments can be costly. The Purple Cows Ultimate Trimmer is the perfect tool for creating your very own felt ribbon. We used real wood felt, however, acrylic or blended felts work just as well. And the precision blade means you will have straight ribbon every time.

Supplies:

- Purple Cows Ultimate Rotary Trimmer
- Deco Blade of your choice
- Felt Sheets

1. Slide your felt sheet under the snap-down guard. Be sure that it is lying flat, and lock into place.
2. Cut a strip. You will discard this first strip as it only has one edge.
3. Unlock the felt from the guide, and slide it over so that the desired width of felt is out from under the guard.
4. Cut the strip. Now you have a double-edged felt ribbon, ready to adhere to your favorite layout or project.
